The electric trunk line railroad, comprising over 550 miles of main line, modern, standard-gauge railroad, is equipped with automatic block signal systems, repair shops, car barns and 1,223 freight and passenger cars. This system connects the cities of Peoria, Springfield, Bloomington, Danville, Urbana, Champaign and Decatur with Edwardsville, Granite City, Madison, Venice and St. Louis, entering St. Louis over a steel toll bridge owned by the corporation in fee, into its own terminal in the heart of St. Louis. Another trunk line connects the cities of Joliet, Ottawa, Marseilles, Peru and Princeton. A subsidiary, the St. Louis Troy & Eastern RR., operates a steam road of 45 miles, which enters East St. Louis and exchanges traffic with the St. Louis Belt System.

Most of the principal lighting *franchises* are unlimited as to time. The electric railroad, except in municipalities, is almost entirely on private right-of-way.

Has equal voting power, share for share, with every other share of capital stock outstanding. In case of involuntary liquidation entitled to $100 plus accrued and accumulated divs.; if voluntary, to $105 plus divs. before all other stocks. Additional 6% and 7% cum. pref. stock over and above the now authorized amount may be issued to be paid in full, provided combined net earnings of corp. and its subsidiaries available for pref. divs. for 12 out of preceding 15 months have been at least twice annual 6% and 7% cum. pref. divs., incl. new issue, and provided assets of the corp. incl. proceeds from sale of additional issue, over and above co.'s debts, are at least $125 per 6% and 7% cum. pref. share (incl. new issue). No other stock equal or superior may be created if upon notice holders of 1-5th of outstanding 6% and 7% cum. pref. stock object. The issuance of additional funded debt is also restricted and in certain cases may be prevented by 1-5th of holders of 6% and 7% pref. stock objecting to it. This 6% and 7% cum. pref. stock is callable on 60 days' notice as a whole or by lot in amounts of 5,000 shares or multiples thereof, on any div. date, at 105 plus divs. In July 1925 $5,000,000 1st pref. 7% stock was *offered* by Blyth, Witter & Co., N. Y., at 95 & div., to yield about 7.37%. V. 119, p. 197. In Feb. 1926 Blyth, Witter & Co. offered $2,000,000 1st pref. 7% stock at 100 & divs. V. 122, p. 1169. In July 1926 $1,500,000 1st pref. 6% stock was offered by the corporation at 92, to yield 6.52%. V. 122, p. 1169. The 1st pref. 6% cum. stock (authorized on July 14 1926 when the dividend rate on 70,000 unissued 1st pref. shares was changed from 7% to 6%. V. 123, p. 842), has the same rights as the 7% pref. stock, the only difference being in the rate of yield.

Bonds.—The first & refund. mtge. provides for an improvement fund. Additional bonds in excess of $56,200,000 of any series under this mortgage maturing not more than 30 years from certification, and of such tenor (maximum interest 7%) as directors may from time to time determine, may only be issued (*a*) approx. $1,650,000 for new additions, &c., to the electric generating and distributing systems; (*b*) for 75% of new acquisitions, &c.; (*c*) for refunding purposes. Sinking fund may be established for the exclusive benefit of one or more particular series. No additional bonds may be issued unless net earnings before bond interest for 12 out of preceding 15 months have been 10% of the principal amount or 1¼ times (whichever is greater) annual interest requirements on all mtge. bonds, incl. new issues. Int. pay. in Chicago or New York. Penna. 4 mills and Maryland 4½ mills taxes and Conn. and Dist. of Columbia personal property taxes not exceeding 4 mills per $1 per annum, and Mass. income tax on int. not exceeding 6% of such int. per annum refunded.

ORGANIZATION.—Incorp. in Delaware July 1 1915 to take over the Rock Island Southern Ry. the Aledo Terminal Ry., the Rock Island Alexis Ry. and the Edwards River Power Co. (all formerly operated by the Rock Island Southern Ry.), as per plan of readjustment in V. 101, p. 449. Under the plan acquired all the com. and pref. stocks of these companies and $1,341,200 (out of $1,873,200) 1st mtge. bonds of the Rock Island Southern Ry. and $415,000 Aledo Terminal Ry. 1st mtge. bonds.

FIELD OF OPERATIONS AND CHARACTER OF BUSINESS.—Runs north from Monmouth to a connection with the Chic. Rock Island & Pac. Ry. at Monmouth Jct., 31 miles, and thence operating into city of Rock Island, a distance of 22 miles, over line leased for 25 years from C. R. I. & P. Ry., which has been electrified. Also 7 miles from Gilchrist Jct. to Aledo. Total miles of single track operated, 66.29. Has connections for Davenport, Ia., Moline and Galesburg, Ill. 10 pass., 243 freight, 2 express and freight, and 7 work cars; 7 steam locomotives. 75-85-lb. rails. Also operates the power house located at Edwards River.

Default—Interest Funding Plan.—Holders of $532,000 Rock Island Southern Ry. bonds were requested to exchange their coupons for the 3 years beginning July 1 1917 for bonds of the same issue, par for par. V. 105, p. 607

Sale of Collateral.—The interest and principal due June 1 1917 on the $266,000 coll. trust notes of the R. I. Southern Ry. remaining unpaid, the $532,000 1st mtge. 5% bonds of that company pledged as collateral were sold at foreclosure Aug. 27 1917, presumably to the committee for the noteholders. Compare V. 105, p. 607.

Liquidation of the Company.—We were advised that the holdings of the company probably will be disposed of and the company dissolved in the course of 1926. V. 121, p. 1789. Up to the time of going to press we did not receive any report as to the reorganization having been completed.

Sub. Co. Receivership.—In April 1920, Judge Martin J. Wade appointed C. N. Abbott and C. H. Bacon receivers for the Rock Island Southern Ry. V. 110, p. 1642.

(1) CHICAGO CITY RAILWAY.

Chicago City & Conn. Rys. Collateral Trust owns 169,719 shares of the capital stock.

Unified Operation of Surface Lines.—See "Chicago Surface Lines" for details of unification ordinance under which the lines of this company are operated jointly with those of the Chicago Railways Co. as a single system under the control of a joint Board of Operation

ORGANIZATION.—Incorporated in Feb. 1859, and has extensive surface road privileges in the south division of Chicago. Has a contract expiring Jan. 31 1927 with the Commonwealth-Edison Co., for the supply of its entire power requirements. The railway has abandoned its producing plants but retains its distributing plants.

FIELD OF OPERATIONS AND CHARACTER OF BUSINESS.—(Incl. Southern St. Ry.). Co. owns 335.97 miles of single track, all now operated by electricity. System covers the South Side of Chicago, extending from the centre of the business district south to 79th St. and between the South Branch of the Chicago River and the Lake.

Ordinances and Franchises.—On Feb. 4 1907 the City Council passed ordinances providing for a settlement of the franchise question. These ordinances were approved at the city election on April 2 1907 and formally accepted by the company's board of directors on April 15 1907. Suit to set aside franchise was dismissed in April 1912. V. 94, p. 1118. An extended outline of these ordinances, one to the Chicago City Railway Co., and covering the lines operated by that company, and the other to the Chicago Rys. Co., and covering the lines of the former Chicago Union Traction Co. (now the Chicago Railways Co.), was given in V. 84, p. 1123. The value of the tangible and intangible property of the Chicago City Ry. at date of the ordinances was fixed at $21,000,000. The city or any company authorized by it is given the right on Feb. 1 or Aug. 1 of any year, on six months' notice, to purchase the entire property of the two systems, or either of them, at their value at date of ordinance, plus "the cost of rehabilitation and extensions, including fair allowances for construction, profit and brokerage." But if the properties are acquired for operation by a private corporation, for its own profit, the purchase price is to be increased 20% —barring the case of a private company which might be willing to turn over to the city all profits above 5% on the cost of the investment. The companies are limited during their operation to an interest return of 5% upon the agreed value plus the cost of rehabilitation and extensions. All net profits above this are to be divided on the basis of 55% to the city and 45% to the companies, but a deficit in any year is to be made good out of the profits of subsequent years. After April 15 1910 the companies are required to set aside 6% of the gross receipts for maintenance and repairs and an additional 8% of the gross receipts to cover renewals and depreciation. Whatever portion of the two funds is not used remains in the funds and passes to the city or its licensee upon purchase. But if the two funds are not sufficient for the purposes named, the companies are obligated to supply additional funds. The franchises granted by the ordinances run until Feb. 1 1927. Purchase price of the property Jan. 31 1926, $55,819,970.

On Jan. 29 1912 City Council passed an ordinance providing for the acquisition by Chicago City Ry. of city lines of the Chicago & Southern Trac. Co. V. 94, p. 349, 629. The latter was sold at foreclosure in Feb. 1912. The lines outside the city were taken over by the Chic. & Interurban Ry.

Decision as to Regulations.—See "Chicago Surface Lines."

CHICAGO SURFACE LINES.

F. J. Lisman & Co. Propose to Take Lines Over.—In Aug. 1926 F. J. Lisman & Co. and associates submitted proposals to Mayor Dever and J. B. McDonough, Chairman of the Local Transportation Committee of the City Council, to take over and operate the Chicago surface lines and motor bus service under a 20-year franchise.

The proposers of the plan claim that under its terms, reorganization of the companies can be effected *without a receivership* or the granting of an indeterminate franchise which would necessitate action by the Illinois Legislature. (The present franchises expire Jan. 31 1927, coincidentally with the maturity of large bond issues).

The Lisman plan provides for construction of subways, extensions and additions to present property, unification and transfers with the elevated lines, extended motor bus service, and a service-at-cost fare, not exceeding present rates. A new company, to be organized under the plan, will create a *first mortgage* to cover an authorized issue of first mortgage bonds, aggregating about $345,000,000, issuable in three series: $50,000,000 series A 5½s, dated Feb. 1 1927, due in 20 years, to be sold for cash to provide funds for immediate construction and improvements; $95,000,000 series B 5s, dated Feb. 1 1927, due in 20 years, *to be given par for par to holders of present first mortgage bonds;* series C bonds to be available at rate of $50,000,000 for each 10-year extension of franchise; or, in event that an indeterminate franchise be granted at a later date, the entire remaining authorized issue to be available at any time.

The new company will also create a *general mortgage* dated Feb. 1 1927, junior to above first mortgage bonds, to secure approximately $70,000,000, of which, roughly, half shall be series A and half series B, series A being preferred over series B. These general mortgage bonds are to be exchanged for junior interests in the existing companies, insofar as the city purchase price will permit. Series A will be 5s and run 25 years, with the right of new company to retain one-fifth of the accruing interest for the first three years to be used toward payment of organization expenses. Series B general mortgage to mature in thirty years and bear interest at rate of 4% for first five years, 4½% for the second five years, and 5% thereafter, with right of new company to retain half of the interest of such bonds for the first three years for reorganization expenses.

The plan provides for a *cumulative sinking fund applicable to each bond issue* of the company, sufficient to retire all such bonds by maturity. Also provides that each subsequent series of first mortgage bonds which may be issued, shall have a cumulative *sinking fund* to retire that series within the life of the franchise then in force, or in case of an indeterminate franchise, within not more than fifty years from date of issue.

The City of Chicago, under the plan, may acquire thirty years hence, when all bonds shall have been retired by operation of the sinking funds, ownership of the entire transportation systems free and clear of debt, without further cost.

On the basis of the city purchase price the present outstanding securities will (under the Lisman plan) receive:

Chicago Rys. 1st 5s, Chicago City Rys. 1st 5s and Calumet & South Chicago 1st 5s will receive in par new co. 1st mtge. 20-year 5s, series B.

Chicago Rys. gen. 5s, series A, will receive par in new co. mtge. series A 25-yr. bonds, bearing int. at the rate of 4% for 3 years and 5% thereafter.

Chicago Rys. series B bonds will receive new co. 30-year general mtge. series B bonds, with int. thereon at the rate of 2% for 3 years, 4% for 2 years thereafter, then 4½% for 5 years, and 5% up to 1957.

The Chicago City Ry. stock will receive approx. the city purchase value of about 118%, half more or less payable in new general mtge. series A bonds and the other half in general mtge. B bonds.

Chicago City & Connecting Ry. 5% bonds will presumably receive the proceeds of securities deposited under their mtge, which is likely to work out approx. 50% each in general mtge. "A" and "B."

Chicago City & Connecting pref. stock has a city purchase value of approx. 32%, which it will presumably receive in general mtge. "B" bonds.

Chicago Rys. purch. money 5s, being within the city purchase price, will also receive general mtge. 5s, dollar for dollar, their proportion of "A" or "B" bonds to be determined later.

Chicago Rys. adj. inc. 4s have a small equity in the city purchase price, which would be paid in new general mtge. "B" bonds.

Further particulars about this plan and its possible effects will be found in V. 123, p. 1112, 1249, 1502, 1631, 1761, 1956, 1995, 2137.

FIELD OF OPERATIONS AND CHARACTER OF BUSINESS.—Under the title of Chicago Surface Lines, the properties of the Chicago Railways Co. and the Chicago City Railways Co. are now being operated as a single system under the control of a joint board of operation in accordance with an agreement between the two companies and the unification ordinance which became effective Feb. 1 1914. While under the terms of this ordinance and the agreement the ownership of the properties remains entirely separate and distinct, the combined earnings are divided upon an agreed basis. For the two years ending Jan. 31 1916 the Chicago Railways Co. received as its share 59% of the income remaining after the payment of all operating expenses, including taxes and maintenance, the other 41% of the income going to the Chicago City Ry. Co., including the Calumet & South Chicago Ry. and the Southern Street Ry., and, beginning with Feb. 1 1916 and until the expiration of its franchise in 1927, the Chicago Railways Co. will receive 60% of the so-called "residue receipts," and the Chicago City Ry. (including the Calumet & South Chicago and the Southern Street Ry.) 40%. The plan provided for a 5-cent fare throughout the city on surface lines, also through routing of cars from one division of the city to another. See details of the ordinance and the agreement for unified operations under date of Dec. 1 1913 in V. 98, p. 1693. An order permitting the State Attorney to file quo warranto proceedings to question the legality of unification ordinance was denied in March 1915. V. 100, p. 1078.

New Franchise.—Particulars about a new franchise sought by Chicago's traction companies at the expiration of the franchises on Feb. 1 1927, are given in V. 121, p. 329. In Jan. 1926 committees were formed to protect security holders in connection with the franchise situation.

CHICAGO RAILWAYS CO.

Lisman Plan.—See about proposed reorganization "Chicago Surface Lines" above.

Unified Operation of Surface Lines.—See "Chicago Surface Lines" for details of Unification Ordinance of 1914, under which the lines of this company are operated jointly with those of the Chicago City Ry. as a single system under the control of a joint board of operation. As to plan for unification of surface and elevated lines, see "Chicago Elevated Rys."

Protective Committee.—See under "Chicago Surface Lines" above. V. 122, p. 1607, 1917, 2039; V. 123, p. 453.

ORGANIZATION.—Incorp. in Illinois in Oct. 1903 and on Jan. 25 1908 acquired at foreclosure sale the property of the old Chicago Union Traction, comprising the lines of the North and West Chicago Street RR. The purchase was made under a modified plan of reorganization and readjustment dated Oct. 15 1907 and outlined in V. 85, p. 1269; see also p. 1576.

FIELD OF OPERATIONS AND CHARACTER OF BUSINESS.—Comprises 594.34 miles of track (including 128 miles of the former Chicago Consolidated Traction Lines). Oper. 2,120 pass. cars, 257 miscell. cars.

Franchises.—On Feb. 5 1907 the City Council passed ordinances providing for a settlement of the relations between the city and the street railway companies. V. 84, p. 338, 390. The *franchises* granted by the ordinance expire Feb. 1 1927 and were approved at the popular election held April 2 1907. On Oct. 10 1910 supplemental ordinance was passed expiring Feb. 1 1927, covering lines of Chicago Consol. Trac. properties. V. 91, p. 1025. See also under "Chicago City Ry." above. A very extended outline was printed in the "Chronicle" of May 11 1907, pages 1123, 1124 and 1125, to which the reader is referred for detailed information.

The ordinance for the Chicago Rys. Co. provides that the valuation of the properties acquired shall be deemed and considered to be $29,000,000 (the value fixed by a board of expert engineers acting for the city) plus $1,779,875 for expenditures from the date of the valuation on June 30 1906 to Feb. 1 1907, making total valuation of properties as recognized by ordinance $30,779,875 as of Feb. 1 1907. With the expenditures already made, the valuation of road, equipment and franchises on Jan. 31 1926 was computed at $94,258,469. For further provisions of ordinance see "Electric Railway" Supplement of April 26 1924.

Control by Trustees.—The trust indenture securing the participation certificates provides that until Aug. 1 1912 and to the full extent thereafter which may be permitted by law until all of the consolidated mortgage bonds of the company shall be fully paid and discharged, the directors of the company shall be elected by trustees, now consisting of Messrs. Harrison B. Riley, Halman G. Pettibone, Abel Davis, Frank G. Gardner and Henry J. Tansley, and provision is made in the trust deed securing the first mtge. bonds for the appointment of a permanent finance committee, now composed of Messrs. Henry A. Blair, B. A. Eckhart and F. H. Rawson, Chicago.

Acquisition of Chicago Consolidated Traction Properties.—On Dec. 27 1910 Judge Grosscup confirmed the sale of the Chicago Consol. Trac. Co. and its eight underlying companies on Nov. 30 1910 to Andrew Cooke and the sale by the latter of all properties *within* the city limits to the Chicago Railways Co. (V. 91, p. 945, 1253, 1511), pursuant to an ordinance passed Oct. 10 1910 (placing valuation at $4,021,982), like in tenor, amendatory and supplemental to ordinance of Feb. 11 1907 (V. 91, p. 1025, 1159). See reorganization plan, V. 90, p. 1613; V. 91, p. 37. The lines *outside* the city were acquired by the County Traction Co. (now the Chicago & West Towns Ry.), which has no connection with the Chicago Railways Co. On Nov. 1 1910 a deposit agreement was entered into by the holders of the securities of the Chicago Consolidated Traction and its subsidiaries, providing for the exchange of the said securities for Chicago Rys. Co. purchase money 4% to 5% bonds and adjustment income 4% bonds, both dated Jan. 1 1911 and maturing Feb. 1 1927. For description of bonds and terms of exchange, see V. 91, p. 1384, and compare V. 90, p. 1613; V. 91, p. 214.

Settlement of Yerkes Suit.—V. 98, p. 1155.

Committee Formed—Seeks Payment of Back Divs.—Holders of Series 1 partic. ctfs. on March 26 1923 elected a protective committee in an effort to obtain unpaid divs. on the certifs. (see below). The committee consists of: Jackson S. Stone, W. F. Prindel, Harry C. Edmonds, Robt. J. Dunham and Orville E Babcock. See V. 116, p. 1410. Compare V. 116, p. 1275

Suit Seeking Payment of Divs. Dismissed.—In June 1923 holders of Series I certifs. filed suit against the co. in the U. S. Dist. Court at Chicago seeking payment of divs. at the annual rate of $8 a share with accruals on that basis from Aug. 1 1917. The city of Chicago and Martin J. O'Brien, City Comptroller, were made parties to the suit because the latter failed, it is alleged, to certify the bonds to which the co. was entitled for extensions of its street-car system as required by ordinances. V. 116, p. 2515; V. 117, p. 2211. On March 22 1924 this suit was decided in favor of the company in the U. S. Dist. Court. This decision was affirmed by U. S. Court of Appeals Jan. 14 1925. V. 118, p. 1664. The U. S. Supreme Court also ruled against the certif. holders. V. 120, p. 2145.

Common 62,000	5,000	5,000	----------

The plan also calls for the creation of a 1st & ref. mtge. For full details of plan see V. 116, p. 615, 1274; also V. 117, p. 893.

FIELD OF OPERATIONS AND CHARACTER OF BUSINESS.—Owns and operates the electric railroad between Evanston, Ill., and Milwaukee, Wis., with a branch line extending from Lake Bluff, Ill., to Mundelein, Ill., embracing 94.30 miles of road and 230 miles single track equivalent, including the new Skokie Valley main line which was opened June 5 1926 and shortens the running time between Milwaukee and Chicago by 30 minutes. Bonds.—The Rockford & Interurban Ry. 1st mtge. 5s, due Oct. 1 1922, were extended to Oct. 1 1930. V. 115, p. 1429. The $490,000 Rockford & Freeport Elec. Ry. 1st mtge. 5s, which fell due May 1 1923, were also extended to Oct. 1 1930. V. 116, p. 1893. See also V. 117, p. 670, for certain additional restrictions imposed in the form of a supplemental mortgage attached to the extension agreements. For protective committees &c., see above. $11,000 1 st mtge. 5s of the co. are owned by the Union Ry., Gas & Electric Co.

Rockford Beloit & Janesville RR. 1st mtge. dated Oct. 1 1905. Interest defaulted on and after April 1925. For committee see above. On April 24 1926 action on a petition rendered by the receiver of the Rockford and Interurban Ry. Co. to turn back and surrender the property of the Rockford Beloit & Janesville RR. Co. was deferred by the Circuit Court of Winnebago County, Ill., pending the intervention in the proceedings of the bondholders' committee of the Rockford and Interurban Ry.

The Rockford Beloit & Janesville RR. committee proposed a *reorganization plan*, dated May 27 1926 to sell the properties at foreclosure to the committee which thereafter is to transfer the properties, &c. to a new company to be organized by T. M. Ellis, Jr., of Beloit, Wis. The new co. is to have an auth. capital stock of 7,000 shs. common stock of no par value and 3,000 6% pref. shares ($50 par), on which the first annual dividend is to be payable one year from date of issuance. All bondholders who have deposited their bonds and have approved of the plan on or before June 15 1926 are to receive under the plan 3 shares of pref. (par $50) and 1 share common (no par) stock for each $1,000 principal amount of bonds surrendered for such exchange, which bonds are to be accompanied by their unpaid coupons unless this requirement is jointly waived by the committee and Mr. Ellis. The preferred stock is to be redeemable at $52 50 per share and divs. on 60 days' notice.

The committee recommends this plan believing that abandonment of the property and its sale for junk would reduce the final distribution to bondholders to a trifle. For full details, see V. 122, p. 3342.

In Oct. 1926 it was reported that a foreclosure order had been entered in the circuit court at Rockford, Ill., providing for the sale of co.'s properties. V. 123, p. 1998.

KENTUCKY ELECTRIC POWER CORP.

Management.—Stuart, James & Cooke, Inc., of New York, consulting engineers.

ORGANIZATION.—Incorp. January 1926 in Delaware. Formerly Kentucky & West Virginia Power Co., Inc. Furnishes electric light and power to the municipality of Nortonville, Ky., and to the principal plant of the Norton Coal Mining Co. at Nortonville. Upon completion of additions and improvements under construction corp. proposes to supply electric light and power to the entire group of mines of the Norton Coal Mining Co., one of the largest producers of coal in the State; other important industries and mines in western Kentucky centring at Nortonville, and various municipalities in this section. It was stated that the electric light and power load, under contract or assured upon completion of additions, incl. transmission lines, would absorb the estimated output of the new plant.

Corp. owns an integrated group of properties, incl. a mine-mouth power plant, extensive coal deposits and water reserves. A new unit containing a 6,250-kva. Westinghouse turbine, with provision for extension to 62,500 kva., is being added to the present power station at Nortonville, giving corp. a total generating capacity of 9,350 kva. The new modern plant under construction is situated at the mouth of the principal mine of the Norton Coal Mining Co., which under a 30-year contract agrees to deliver coal directly to the power plant conveyors, eliminating rail transportation and handling charges, thereby insuring a very low fuel cost. Fuel requirements are further protected by the corp.'s direct ownership of large coal reserves. V. 122, p. 3337.

LOUISVILLE RAILWAY CO.

ORGANIZATION.—Incorp. in Kentucky on Jan. 22 1867 and owns all the street railways in the City of Louisville and its suburbs. In Sept. 1922 the co. commenced operating under an "adjusted franchise" for which it exchanged its equity in long-term *franchises* with the City of Louisville. The "adjusted franchise" containing variable-rate and sliding-scale-of-dividend provisions, runs for 20 years. The rights of the bondholders in the long-term franchises are said not to be affected by the present operating arrangement.

Holding Company Dissolved.—See "Electric Railway" Supplement of April 26 1924.

The Louisville & Interurban RR. has been organized in the interest of the Louisville Ry. to construct a system of urban and interurban lines. No securities have been issued except $4,000,000 stock (increased to that amount in February 1913) to Louisville Ry. Co. In Jan. 1911 Louisville & Interurban RR. acquired the Louisville & Eastern RR. (all of whose bonds, construction notes, receivers' certificates, &c., and about all the stock, was owned by Louisville & Interurban), sold at foreclosure January 3 1911. V. 92, p. 59, 262.

(this company's predecessor), by which its property was to revert to the city on Jan. 1 1917. V. 106, p. 86. A ruling has been handed down by the court which holds that the right of reversion does not extend to any part of the present property of the Omaha & Council Bluffs Ry.

Co. theretofore offered to but not subscribed for by holders of pref. stock of United Rys. Co. V. 123, p. 208, 713. The right to purchase was on the basis of 1-10 of a share for each 1½ shares represented by subscription receipts. V. 122, p. 3455.

ORGANIZATION.—Incorporated in Missouri on March 11 1898 as the Central Traction Co., but changed its name to above on July 10 1899. On Dec. 31 1906 absorbed the St. Louis & Suburban Ry., giving its pref. stock, share for share, for the stock of that company. The United Rys. guarantees the $4,500,000 gen. mtge. bonds of the St. L. & Sub. Ry. See V. 83, p. 39; V. 84, p. 105. In 1908 acquired a controlling interest in the Missouri Electric Co., successor to the St. Louis St. Charles & Western RR., which was sold at foreclosure in July 1905. For receivership and reorganization see above.

FIELD OF OPERATIONS AND CHARACTER OF BUSINESS.—The United Railways Co. comprises all the street car lines in operation in St. Louis, except Illinois Traction system operating out of St. Louis into Illinois. On Dec. 31 1925 owned total of 462.88 miles of track (including the St. Louis & Suburban), of which 347.28 miles are in the city and 115.60 miles are county track. Has 1,604 passenger cars, 2 special cars, 2 express cars, 7 snowplows and 35 snow sweepers, 3 electric locomotives and 166 service cars of various kinds. Total, 1,819. The company was originally leased to the St. Louis Transit Co., but under a readjustment arranged in Oct. 1904 by Messrs. Brown Bros. & Co. (V. 79, p. 1333), the lease was canceled and the $17,264,300 stock of that company nearly all exchanged for voting trustees' certificates for common stock of the United Railways Co. on the basis of $500 Transit stock for $200 voting trustees' certificates. Voting trust has expired and com. stock has been issued for trust certificates.

Under this plan the $20,000,000 refund. and impt. mtge. bonds of the St. Louis Transit Co., of which $8,000,000 has been issued, were cancelled, and in their place the same company issued $10,000,000 of 5% improvement bonds guar. by the United Rys. Co. of St. Louis, this guaranty being secured by a mortgage on all of that company's property next in rank to that of its general mtge. Bonds.—Of the $45,000,000 general first mortgage bonds originally authorized, $4,000,000, which had been previously reserved for the purpose of retiring bonds of the St. Louis & Suburban system, in case of purchase, have been canceled, making the total authorized issue now $42,000,000, of which $9,768,000 are reserved for the retirement of underlying liens. In Aug. 1919 $1,932,000 bonds of this issue which were owned by the company were ordered canceled by the Federal Court. V. 111, p. 787. The bonds are secured by all the stocks of the constituent companies, and by direct mortgage lien upon their property and franchises. In 1903 the general mortgage bonds were listed on the New York and Philadelphia stock exchanges (see V. 76, p. 980, V. 89, p. 995), and in April 1906 the St. Louis Transit Co. improvement bonds were listed on the New York Stock Exch.

Interest Advanced by Protective Committees.—The Jan. 1 1924 interest on the first gen. mtge. 4s was advanced by the three protective committees for this issue. V. 118, p. 204. Up to May 1925 the committee had not yet been reimbursed by the receiver. The July 1 1924 coupon was paid by the receiver on Dec. 31 1924, together with interest on each coupon at 6% per annum. The committee for the St. Louis Transit Co. 20-year 5% improvement bonds advanced to such of its depositors as so desired the amount of interest due and in default April 1 1924 on those bonds, and announcement has been made that, should Oct. 1 1924 interest be defaulted, the committee will advance same to depositing bondholders. V. 118, p. 1667; V. 119, p. 1511. Interest advanced by Protective Committee paid Feb. 15 1926 by order of court. On May 20 1926 Federal Judge Faris at St. Louis, Mo., granted authority to Rolla Wells, receiver, to pay the semi-annual interest, due July 1 1926, on these bonds. V. 122, p. 2950.

PACIFIC GAS AND ELECTRIC CO.

(*See Map on page* 243.)

FIELD OF OPERATIONS AND CHARACTER OF BUSINESS.—Owns and operates extensive properties employed in the production and sale of electricity and gas for light, heat and power, about 60% of its revenues being derived from electricity and about 35% from gas. It also owns and operates the entire street railway system of Sacramento, 44 miles of track, and is engaged in the sale of steam for heating and of water for irrigation and domestic purposes, deriving approximately 5% of its revenue from these and other less important activities. All the properties owned in fee except those of the Mt. Shasta Power Corp. and California Telephone & Light Co. (of which the company owns the entire outstanding stock) and those leased from the Sierra & San Francisco Power Co. and Yuba River Power Co.

The operations of the company extend into 38 counties of central and northern California, having an area of 59,000 square miles and an estimated present population of over 2,200,000. The business field embraces the important San Francisco Bay section and the fertile Sacramento and San Joquain valleys. The company serves eight of the twelve largest cities in California.

At the close of 1925 the company operated 28 hydro-electric generating plants having an aggregate installation of 534,819 h. p., four modern steam turbine electric plants with an aggregate installation of 190,349 h. p., also 263 substations and over 12,600 miles of transmission and distribution lines with a connected load of 1,498,878 h. p. A new station was opened in Aug. 1925, adding 108,580 h. p. to the total installed capacity, making the total hydro-electric capacity 534,819 h. p.

The gas department includes 16 manufacturing plants with an aggregate capacity of 110,648,000 cubic feet per day and 4,108 miles of mains.

In Dec. 1919 leased for 15 years the properties of the Sierra & San Francisco Power Co. V. 109, p. 2362. In Nov. 1925 applied to California RR. Acquisition in 1926 of the Bell Electric Co., which had been selling and distributing electricity in Auburn, Calif., and vicinity. V. 123, p. 1383.

Franchises in substantially all of the cities and towns served, it is claimed, are perpetual, the U. S. Supreme Court on April 6 1914 having ruled that all franchises of public service corporations within the State of California obtained prior to Oct. 10 1911 were of perpetual duration and could not be altered.

NEVADA CALIFORNIA ELECTRIC CORP. (THE).

(*See Map on page* 246.)

ORGANIZATION.—Incorporated in Delaware on Dec. 12 1914. Owns all the outstanding capital stocks, except directors' qualifying shares and all the bonds of Nevada-California Power Co., Southern Sierras Power Co., Interstate Telegraph Co., Hillside Water Co., Cain Co., Imperial Ice & Development Co.

Stockholders on April 13 1926 increased the capital stock from $10,000,000 pref. and $20,000,000 common (par $100) to $25,000,000 pref. and $25,000,000 common stock (par $100). V. 122, p. 1762, 2192.

FIELD OF OPERATIONS AND CHARACTER OF BUSINESS.—The system is engaged in generating hydro-electric power on the eastern slope of the Sierra Nevada Mountains and in transmitting such power over an extensive transmission system, extending throughout southwestern Nevada and the entire eastern section of California from the middle of the State south to the Mexican line.

Owns and operates 11 hydro-electric plants having a total installed generating capacity of 93,420 h. p., together with supplementary steam and gas plants which bring the total generating capacity up to 106,620 h. p.

The main hydro-electric plants are located in California, on Biship Creek, in Inyo County, and on Owens River, and Leevining, Rush and Mill Creeks in Mono County. The Bishop Creek water, by means of connecting pipe lines, passes consecutively through five generating plants (aggregating 43,520 h. p. generating capacity). Both the Bishop Creek and the Mono County water sheds are situated well up in the Sierra Nevada Mountains where the deep winter snows furnish natural reservoirs which the summer sun melts, causing the water to run down into the impounding reservoirs and thence through the power plants. As a result of an important contract between the Southern Sierras Power Co., a subsidiary company, and the San Diego Consolidated Gas & Electric Co., executed in 1924, a tie line making physical connection of properties of the two companies has been completed, and has been in continuous use since Aug. 1924 in helping to meet requirements in Imperial Valley. This tie line provides an additional 12,500 h. p. standby capacity service for the southern part of the system and also permits the sale of surplus power to the San Diego company.

Surplus power is interchanged with the Southern California Edison Co. through physical connections at Colton and San Bernardino. The system also transacts a general telegraph and telephone business, operating 650 miles of line paralleling the power system. In addition, it operates an extensive ice manufacturing business in southern California.

The system has 1,671 miles of high-tension transmission lines, of which 238 consist of a double circuit three phase 140,000 volt steel tower line. The remaining transmission lines cover 83 miles of 140,000 volt single circuit wooden and steel pole lines, 332 miles of 88,000 volt single circuit wooden pole lines, 317 miles of 55,000 volt single circuit wooden pole lines, 16 miles of 33,000 volt double and single circuit steel pole lines, 481 miles of double and single circuit, 33,000 volt wooden pole lines, and 204 miles of double and single circuit, 17,000 and 11,000 volt wooden pole lines. In addition, there are 808 miles of wooden pole distribution lines of 6,600 volts and under. V. 122, p. 3453.

Stock.—Pref. stock is entitled to cumulative dividends at rate of 7%, and in the event of liquidation, has preference over common stock to par and accrued dividends.

Bonds to be Called.—The proceeds from the sale in June 1926 of the $23,000,000 1st trust mtge. g. bonds, series of 1956 and $3,000,000 15-yr. debentures was to be used to retire the following bonds (incl. all of the outstanding 1st lien 6% g. bonds, series "B" dated Oct. 1 1920, due Oct. 1 1950, which were called Oct. 1 1926 at 103 & int. Note.—Stock subscribed for but not fully paid in: Common, $3,664,825; pref. series A, $301,200; Series B, $4,416,075.

In July 1926 California RR. Commission authorized the co. to issue on or before June 30 1927 400,000 shares of its Series B pref. stock, par $25. V. 123, p. 712.

All classes of stock have equal voting power. Original pref. receives 5% cum. divs. before any other class of stock. The pref. stock is divided into 4 classes as indicated in the above table, series A, B, C and D, and receives, after all cum. divs. on the original pref. for all previous years have been paid, respectively, 7, 6, 5½ and 5% and no more. Except as to div. rate, no distinction or preference exists among said 4 series of pref. stock. The pref. dividends are cumulative and payable before common stock receives any divs. Original pref. is entitled to participate in any distribution of surplus or net profits to pref. stock to the extent that such distribution shall, as to any series of pref. stock, be greater than 5% and such right of participation is cumulative. After original pref. and pref. stock have received all such divs., common stock is entitled to divs. up to 7%, 6%, 5½% or 5%, respectively, provided any pref. stock, series A, B, C, or D, respectively, is outstanding. Any balance is then applicable to payment of further divs. equally per share upon original pref. and common stock.

As to assets, original pref. is entitled to par and divs. before all other stocks. Thereafter, pref. receives par and divs.; thereafter common receives par; if any balance is left, same is to be distributed ratably to the holders of original pref. and common stock.

The pref. stocks may be increased or diminished by a vote representing at least 2-3 of the entire subscribed or issued capital stock of the corp. All series of pref. stock are red., all or in part ,at $28 75 and divs. Divs. on the pref. stock shall also be cumulative, and shall be payable before any divs. on the common stock shall be paid or set apart.

Additional bonds may be issued for only 75% of expenditures for add. and ext. to the co.'s properties, provided annual net earnings have been at least equal to 1¾ times int. on all ref. mtge. bonds, incl. those proposed to be issued, and on all bonds for retirement of which ref. mtge. bonds are reserved.

Bonds may be issued in various series with such maturities, rates of int., redemption features, &c., as may be determined from time to time.

Special Trust Fund.—Adequate provision for depreciation and renewals of the property has been made in the mtge. by means of a special trust fund which may be increased or decreased by agreement between the trustee and the co. This fund may be withdrawn for cost of ext. & add'ns against which no ref. mtge. bonds shall be issued, for renewals and replace'ts, or at option of co. for retirement of ref. mtge. or underlying bonds. CENTRAL CALIFORNIA TRACTION CO.

ORGANIZATION.—Organized in California in Aug. 1905 to construct an interurban system of electric roads for passengers and freight in the central valleys of California. Road operates over private right-of-way, except in the cities. *Franchises* in all the cities of the system run for 50 years. An additional freight and passenger franchise was awarded company in May 1909 for City of Sacramento. An assessment of $5 a share was called for payment Feb. 20 1908. V. 86, p. 667. In Jan. 1918 another assessment of $5 per share was levied on both classes of stock, delinquent Feb. 25 1918, to provide additional equipment, improve trackage and restore the company's credit by reducing floating debt. The necessity for this action was ascribed to years of unprofitable operation due to jitney competition, which is now regulated. See V. 106, p. 497.

In Aug. 1925 the Southern Pacific Co. applied to the I.-S. C. Commission for authority to acquire control of the company by exchange of stocks and bonds. For particulars see V. 121, p. 1099.

Plan to Reduce Interest, &c.—In 1917 holders of the 1st M. 5s signed an agreement reducing the int. rate from 5% to 2% for the years 1917, 1918 and 1919 and waiving default in int. and also the sinking fund provision. Compare V. 106, p. 497. Another agreement under same conditions expired Oct. 1 1922. A new agreement has been made whereby bondholders agree to accept 2½% instead of 5% for 1923, 1924 and 1925.

GATINEAU POWER CO.

Control.—Co. is a wholly owned subsidiary of *International Paper Co.*

ORGANIZATION.—Incorp. in Quebec, Canada, in 1926.

FIELD OF OPERATIONS AND CHARACTER OF BUSINESS.—Co. owns in fee or holds through long-term Government leaseholds water power sites in the Province of Quebec, Can., with an aggregate potential capacity in excess of 700,000 h.p. Co. is undertaking a development program calling for completion by the fall of 1928 of four hydro-electric plants with an initial aggregate installed generating capacity of 397,500 h.p., of which 373,500 h.p. is on the Gatineau River, which enters the Ottawa River from the north in the vicinity of the city of Ottawa. Two of the developments with over half of the initial capacity lie within 7 miles of that city. The Kipawa plant at the outlet of Lake Kipawa, Que., is almost completed up to a capacity of 24,000 h.p. The Chelsea and Farmers plants on the Gatineau River are to be completed up to their initial installed capacities of 131,000 h.p. and 92,500 h.p., respectively, early in 1927. Construction work on the fourth development, the Paugan plant, was to be started in the fall of 1926 and to be in operation by the fall of 1928 with a capacity of 150,000 h.p. A storage dam is being constructed at Bitobi Rapids, 90 miles above the Paugan plant, which will create a storage reservoir of 107 sq. miles and a capacity of 82,000,000,000 cu. ft. This reservoir, which is to become the property of the Province of Quebec and operated by the Quebec Streams Commission, will equalize the flow of the Gatineau River. The three power plants on the Gatineau River have been designed to permit the comparatively inexpensive addition of an aggregate of over 100,000 h.p. additional when the water storage facilities are increased, making a total capacity of about 500,000 h.p.

Under the terms of a 30-year contract with the Hydro-Electric Power Commission of Ontario, the Commission is to purchase 80,000 h.p. of electric energy during the 12 months beginning Oct. 1 1928, the amount increasing annually thereafter to a maximum of 260,000 h.p. during the 12 months beginning Oct. 1 1931, which rate is continued throughout the life of the contract.

In addition, Canadian International Paper Co. is to purchase under a 30-year contract a minimum of 74,000 h.p. per annum, and the Canada Cement Co., Ltd., has contracted to purchase 3,000 h.p. per annum for an initial period of 15 years from Oct. 1 1930, subject to renewal. V. 123, p. 454.

No funded debt in addition to the $37,500,000 1st mtge. g. bonds and $12,500,000 6% gold debentures is issuable against the existing development up to the initial capacity of 397,500 h.p. of the Paugan, Chelsea, Farmers and Kipawa plants. Add'l bonds of 5% series, due 1956, or of other series of such tenor as directors may determine, may be issued (*a*) for refunding an equal principal amt. of 1st mtge. of any series, or (*b*) for 75% of add'ns, incl. securities of other corporations supplying or transmitting elec. power, but only when net earns. for 12 consecutive out of preceding 15 cal. months (together with 80% of estimated future net earnings from contracts as define in the trust deed) have been at least twice annual interest on all 1st mtge. bonds outstanding, incl. proposed issue. Not more than 15% of aggregate amount of 1st mtge. bonds issued other than for refunding may be issued in connection with the future acquisition of securities of such other corporations, and then only upon pledge of all 1st mtge bonds of such other corporations which shall be at least equal in face amount to the bonds so issued; and the bonds so issued shall not exceed 75% of the property of such other corporations. The trust deed provides for the modification or alteration thereof or of any supplemental indenture, with the assent of holders of from 50% to 75% (depending upon the percentage, if any, opposed thereto) of aggregate principal amount of bonds, but does not permit extension of maturity or reduction of interest rate, or any other modification in terms of payment of such interest, without the consent of the holder thereof, or any change in the lien of the trust deed with respect to the property covered thereby. There is an *annual sinking fund*, payable in cash or bonds, commencing Dec. 1 1927, equal to ½% of the greatest aggregate principal amount of 1st mtge. bonds at any time outstanding. Bonds acquired by sinking fund are to be cancelled forthwith.

5% series, due 1956, are red. on any interest date on 30 days' notice at 105 through June 1 1936; at 104 through June 1 1941; at 103 through June 1 1946; at 102 through June 1 1951; and thereafter and prior to maturity at 101; in all cases with interest. Penn. 4 mills tax refundable. In July 1926 Bankers Trust Co., Harris, Forbes & Co., Lee, Higginson & Co., Blair & Co., Inc., The Union Trust Co. of Pittsburgh, Continental & Commercial Trust & Savings Bank, Chicago; Halsey, Stuart & Co., Inc., and Redmond & Co. sold at 94 and int., to yield over 5.40%, $25,000,000 5% series, due 1956. V. 123, p. 454.

Guaranty of Completion.—A deposit sufficient to provide funds for the completion of the program up to the initial capacity of 397,500 h.p. is to be held in escrow, subject to withdrawal as expenditures are made, and is to be composed largely of cash and the balance of $12,500,000 1st mtge. bonds, International Paper Co. agreeing to find purchasers for these bonds as additional cash is required, and guaranteeing to provide any additional funds which may be necessary for completion of the initial development program.

Note.—International Paper Co. with its subsidiaries is the largest manufacturer of paper in the world and one of the largest holders of water powers in North America. Upon completion of the present development program of Gatineau Power Co., I. P. Co. with its wholly owned subsidiaries, will have developed water powers with a total installed capacity of almost 600,000 h.p. (500,000 h.p. hydro-electric and 100,000 h.p. hydraulic), capable of being increased through further development and through the utilization of undeveloped sites to about 1,400,000 h.p. V. 123, p. 454.

Debentures.—The 6% *sinking fund gold debentures, due* 1941, were to be listed on the Boston Stock Exch., and have a cumulative *semi-annual sinking fund* payable in cash on debentures at current redemption price, beginning June 15 1927, estimated to retire well over 40% prior to maturity. Red., all or part, on 30 days' notice at 105 to and incl. June 15 1931, and thereafter at ½% less each succeeding year plus interest in all cases. Penn. 4 mills tax refundable. V. 123, p. 580.

ESTIMATED EARNINGS.—Net earnings from the Chelsea, Farmers and Kipawa plants available for interest and reserves, even before completion of the Paugan plant, will, it is estimated, be about 1.7 times annual interest on $25,000,000 1st mtge. gold bonds. Upon completion of all four power plants and the delivery of the ultimate amount of power under the contract with the Hydro-Electric Power Commission of Ontario, it is estimated that net earnings will be almost 3 times annual interest on $37,500,000 1st mtge. 5% bonds. BERLIN CITY ELECTRIC CO.

(Berliner Staedtische Elektrizitaetswerke A.G.)

ORGANIZATION.—Berliner Staedtische Electrizitaetswerke A.-G., and Berliner Staedtische Gaswerke A.-G., which latter company guarantees under-mentioned note issue of Berliner Staedtische Eletrizitaetswerke A.-G., were organized by the City of Berlin, Germany, in 1923, for the purpose of separately operating the electrical and gas works formerly operated by the city, all the stock of both companies being owned by the City of Berlin. The first installation of electrical works was made in 1884, and of gas works in 1825.

FIELD OF OPERATIONS AND CHARACTER OF BUSINESS.—Berlin has a population of approx. 4,000,000. The electric company supplies about 80% and the gas company (Berliner Staedtische Gaswerke, A.-G. see above) about 75% of the total consumption of the city in their respective fields. The electric company operates plants of over 205,000 k.w. capacity and also purchases a substantial amount of additional current. Co. is expanding its plants to a total capacity of 400,000 k.w. Owns 6,600 miles of distribution lines. Current is supplied for domestic use as well as for the local street and underground railroad and for numerous industrial plants in the city and vicinity. Sales in 1924 over 462,000,000 k.w.h., for 1925 over 662,000,000 k.w.h. 358,669 customers at the close of 1925.

The Gas Co. (see above) supplies gas for domestic and industrial use, and owns plants of over 64,000,000 cu. ft. daily capacity. Sales in 1924 about 11,200,000,000 cu. ft., and in 1925 about 13,800,000,000 cu. ft.

Rates.—The City of Berlin (which owns all the stock of both companies) has agreed to rates for both services sufficient to cover operating expenses, rental (8% of gross), depreciation, interest and amortization of loans, and to provide working capital.

$1,000,000 of the above notes, dated Feb. 1 1926, is due Feb. 1 1928, and $2,000,000 Feb. 1 1929. Call., all or part, on 6 months' notice, at par and int., with a premium of ½% for each unexpired year or fraction thereof. Principal and int. payable free from all present or future German taxes. Unconditionally *guaranteed* as to payment of principal and interest by endorsement by *Berlin City Gas Co.* (Berliner Staedtische Gaswerke A.-G.). V. 122, p. 881, 1760.

Funded Debt.—The gas co. has no funded debt, but the electric co. in 1925 secured a loan in Europe of 30,000,000 Swiss francs (about $6,000,000) due in 1940, the proceeds of the European loan and of this loan being used only in the construction of additional generating capacity. The European loan is the obligation of the electric co. and not secured by mortgage.

Taxes.—The electric co. has agreed that if during the life of this loan it shall pledge any of its revenues as security for any other loan, these notes shall be equally and ratably secured thereunder.

Dawes Plan.—Neither of the companies is directly liable for payment under the Dawes plan, but each shares with the other departments of the City of Berlin in the legal obligations for the execution of the plan. This obligation for the entire city for the year ending in Sept. 1926 amounted to $475,000 and increases to a maximum annual payment in 1928 of $1,-150,000. This total is, however, divided among some 75 departments, incl. such income producing activities as waterworks, tramways, subways, harbor works, warehouses, markets., &c., in a proportion not yet determined.—See also V. 122, p. 746, 881, 1760.

ELECTRIC POWER CORP.

(Elektrowerke Aktiengesellschaft.)

Controlled by United Industrial Corp. ("Viag"), which owns the entire capital stock. The entire stock of Viag is owned by the *German Government*.

ORGANIZATION.—Through the merger of various companies in 1921, corp. attained major importance and now supplies electric power within a territory having a population of over 16,000,000.

FIELD OF OPERATIONS AND CHARACTER OF BUSINESS.—Corp. supplies power entirely at wholesale, over 60% of its output being sold to distributing systems serving the Province of Brandenburg, incl. the City of Berlin, the Province of Saxony, the Free State of Anhalt and the Free State of Saxony. In this manner corp. supplies about 75% of the current consumed by the City of Berlin.

Corp.'s properties include 3 large modern power plants with a total installed capacity of 312,000 k.w., and approx. 628 miles of 110,000-volt transmission lines. These lines, with connecting 110,000-volt lines owned by various distributing companies served, form a total inter-connected 110,000-volt system of over 1,200 miles of lines. Its 3 large steam plants are adjacent to extensive lignite coal fields owned by it and estimated to be sufficient to furnish its entire fuel supply for more than 50 years. 70,000 k.w. additional capacity are being installed and were expected to be completed early in 1926. Corp.'s transmission lines are also being extended into the Province of Silesia. V. 120, p. 1457; V. 121, p. 1568.

Relation to Dawes Plan.—Co. by reason of Govt. ownership (through Viag) of all of its capital stock, is now exempt from the operation of the so-called Dawes Plan. The German Govt., however, in order to equalize the reparations burden, requires the company to make certain annual payments, estimated as not exceeding $150,000, which are unsecured and correspond in amount to the annual charges for interest and amortization of Dawes industrial debentures which would be imposed upon its properties if privately owned. V. 120, p. 1457.

RHINE-WESTPHALIA ELECTRIC POWER CORP.

(Rheinisch-Westfaelisches Elektrizitaetswerk Aktien-Gesellschaft.)

ORGANIZATION.—Organized under the laws of the German Reich and of the Free State of Prussia on June 24 1898. With its subsidiary cos., comprises the largest electric light and power system in Europe with respect to property value, earnings, capacity of power stations and number of customers served. Serves over 250,000 industrial and residential customers in a territory of nearly 6,000 sq. miles, and includes a large part of the Rhineland, extending from the Netherlands frontier on the north and west, into the Province of Westphalia on the east, and south to the River Ahr. This area includes the Ruhr District, the most important industrial section of Germany. The communities entirely supplied by the system have a population of approximately 4,000,000 and include the cities of Essen, Muehlheim-Ruhr, Gelsenkirchen, Crefeld, Muenchen-Gladbach, Wesel, Osnabrueck, Remscheid, Solingen and Neuss. In addition corp. furnishes electric energy to large portions of the cities of Cologne, Duesseldorf, Duisburg andOberhausen, and to the extensive plants of the largest inland harbor of Europe at Ruhrort.

The system includes 9 electric generating stations with an aggregate capacity of 630,000 h.p. The principal station, the Goldenberg plant, is one of the largest and most modern in the world, and has a capacity of 390,-000 h.p. Its equipment includes four 67,000 h.p. steam-turbo units installed during the past 2 years. The transmission and distribution systems comprise over 630 miles of 110,000 volt steel tower lines and 8,250 miles of medium and low voltage lines which supply approximately 350,000 electric meters. The above figures do not include the many affiliated electric companies of whose stocks substantial amounts are owned. The electric output for the fiscal year ended June 30 1925 was 1,239,000,000 k.w. hours.

The fuel for corp.'s power stations is obtained almost entirely from hard coal and lignite mines owned by subsidiary cos. and located under or immediately adjoining the stations. The hard coal mines, estimated to contain 75,000,000 tons (of 2,000 pounds), are being mined at the rate of 1,400,000 tons a year. The lignite mines are estimated to contain 450,000,000 tons, and the power stations of the corp., which are designed to burn this fuel efficiently, consume appr. 4,000,000 tons a year. In the second half of 1925 corp. acquired a half interest in a company, located in the central part of Germany, which owns an electric distribution system and lignite mines having about 160,000,000 tons of fuel recoverable by the open pit method.

Corp. has under construction or in contemplation a number of extensions to its transmission system, including a line 300 miles in length (150 miles now nearing completion) to connect with hydro-electric power developments in southern Germany These new high tension lines will be operated initially at 230,000 volts but are designed for an even higher pressure.

Corp. also owns a modern coke oven plant which supplies gas at wholesale to the City of Essen, and a high pressure gas transmission system with 150 miles of pipe lines, through which were delivered during the past fiscal year, 2,400,000,000 cu. ft. of gas obtained from neighboring coke oven plants. Corp. also owns the entire capital stock of two relatively small electric railway companies, and operates under lease several municipally owned lines.

Control.—The various municipalities and provinces served, together with the State of Prussia and the German Reich, own a substantial majority of corp.'s stock. V. 121, p. 2404

SAXON PUBLIC WORKS, INC.

(Aktiengesellschaft Saechsische Werke).

ORGANIZATION.—Organized in Dresden, Germany, Nov. 13 1923 under the laws of the German Reich and the Free State of Saxony. Since its organization all of the capital stock of the company has been and still is owned by the Free State of Saxony. At the time of its organization the company took over from the Free State of Saxony all of the electric power plants and coal mines owned and operated by the State since 1917, as well as certain stock interests in similar enterprises which had been acquired by the State. Co. controls Electric Power Works of West Saxony.

FIELD OF OPERATIONS AND CHARACTER OF BUSINESS.—Company is primarily engaged in the generation of electric energy through steam power plants, and its transmission and distribution throughout the State of Saxony and in certain adjacent territories. The territory served has a total population of over 5,000,000, with an aggregate area of about 6,950 square miles, and includes Dresden, with a population of about 608,000, and Leipzig with a population of 608,000. The present electric generating plants of the co. have a capacity of 327,000 h.p. (incl. 133,000 h.p. in process of installation). The power is delivered through a transmission and distribution system, including 1,782 miles of high tension lines. Of the foregoing, over 264 miles are 100,000-volt lines of steel tower construction. V. 120, p. 706.

Electrical Output (Current Delivered in Kilowatt Hours).

1917	36,375,159	1920	77,230,933	1923	292,134,244
1918	66,564,910	1921	144,431,333	1924	356,681,574
1919	60,846,639	1922	243,249,296	1925	486,681,704

Coal.—Company's coal fields cover an aggregate area of approximately 83,000 acres. Most of the coal is of the so-called "brown coal" or lignite character. Although this coal in its raw state has a relatively low heating content as compared with the best grades of American bituminous coal, it can be extracted at an extremely low cost through the system of open surface workings (which permits the use of continuous bucket dredging and other labor-saving machinery), inasmuch as the average depth of surfaces before reaching the coal strata is only 8 to 16 yards, below which the coal strata extend for a further depth of 20 to 60 yards. Consequently the coal can be delivered to the company's adjacent electric plants at an extremely low cost per unit of heating value.

The output of brown coal from the mines owned has increased from 676,000 tons (of 2,000 lbs. each) in 1917 to over 2,000,000 tons in 1925. Over two-thirds of the output is used in the company's power plants and the balance is either sold to industrial customers in its raw state or is compressed in briquette form (thereby increasing its heating value nearly three times by the elimination of excess moisture) and retailed to local customers in the surrounding territory.

Through more than 1,900 borings the company's brown coal reserves have been reliably established by independent experts at over 3,700,000,000 tons, of which over 3,200,000,000 tons can be extracted through the above described method of open workings.

Stock.—The 20,000 shares common series A and 20,000 common series B shares have an aggregate par value of 40,000,000 marks ($9,523,809). In Sept. 1926 we were informed that the State expected shortly to purchase 60,000,000 marks ($14,285,714) par value additional stock, 25% to be initially paid in.

Bonds.—The 1st mtge. 20-year bonds, in addition to being unconditionally *guaranteed by the Free State of Saxony* as to principal and interest by endorsement on each bond, are secured by a direct 1st mtge. under German law on substantially all of the real property of the co., now owned or hereafter acquired with the proceeds of the bonds, incl. the electric power plants and coal mining rights, subject, as to certain relatively unimportant parts of the property, to liens aggregating less than $643,000 and on certain recently acquired property, to the charges securing approximately $262,000 "Dawes Debentures" existing at time properties were acquired. Inasmuch as all of the stock of the co. is owned by the State of Saxony, the co. is not required under the Industrial Charges Law (Industrie-Belastungs-Gesetz, Aug. 30 1924) to issue either negotiable or non-negotiable debentures under the so-called "Dawes Plan." In accordance with another law which effects a further internal distribution within Germany of the burden of the so-called "Dawes debentures," the co. will be required to make certain annual payments, the amount of which, it was stated, will not exceed $57,000 p. a.

The bonds are redeemable as a whole on Feb. 1 1930 or thereafter prior to Feb. 1 1935 at 105, and on or after Feb. 1 1935 at 100. Sinking Fund.—Beginning Aug. 1 1935 a sinking fund will operate to retire semi-annually 1-20th of the principal amount of bonds of this issue outstanding on Feb. 1 1935, either by delivery to the trustee of bonds by the company, or by redemption thereof by lot at 100.

The *gen. & ref. mtge. bonds* are *unconditionally guaranteed by the Free State of Saxony* as to principal and interest by endorsement on each bond. They are *secured* by direct mortgages on the operating properties of co. and Electric Power Works of West Saxony, subject only to the charges securing less than $825,000 industrial debentures issued under the "Dawes Plan," and to $15,442,501 closed mortgages on the property. Additional gen. & ref. bonds may be issued: $15,000,000 against acquisition or retirement of outstanding 1st mtge. bonds, and $20,000,000 for 50% of cost of fixed property of co. or its constituent cos. (or for the cost of stocks of a constituent co. owning fixed property), acquired after May 1 1926, which fixed property shall be mortgaged as security for the gen. & ref. mtge. guar. g. bonds, provided net earnings after operating expenses, maintenance and taxes for 12 consecutive calendar months have been not less than twice annual int. on all underlying bonds in hands of the public and all gen. & ref. mtge. bonds outstanding, incl. proposed issue, and the maximum annual fixed charges on any industrial debentures. "Constituent cos." are those of whose stocks at least 90% is owned by the co. and whose properties are mortgaged as security for the gen. & ref. mtge. bonds. Additional bonds may be issued in series, from time to time, of such tenor as co. may determine. A *semi-annual sinking fund* is to begin Feb. 1 1930, calculated to retire, prior to maturity, more than 60% of 6½% series, due 1951. In the case of each new series a sinking fund is to be created to retire not less than half of aggregate principal amount of the bonds of such series issued. *6½% series, due* 1951, are red., all or part, at option of co. or by the sinking fund on any int. date, on 30 days' notice at 100. The National City Co. and Lee, Higginson & Co. sold in July 1926 $15,000,000 6½% series, due 1951, at 91½ and int., to yield 7.24%. The entire issue amounted to $15,000,000, of which, however, $4,000,000 had been withdrawn for offering in various European markets, incl. $2,000,000 to be placed in the Netherlands by an Amsterdam group composed of Nederlandsche Handel-Maatschappij, Mendelssohn & Co. and Pierson & Co. UNTERELBE POWER & LIGHT CO.

(Elektricitaetswerk Unterelbe, Aktiengesellschaft)

Control.—Co.'s entire capital stock (20,000 000 R. M. par value) is owned by the City of Altona.

FIELD OF OPERATIONS AND CHARACTER OF BUSINESS.—Co. supplies electric power and light without competition in the City of Altona and certain nearby districts. In addition, in 1926 it acquired from the City of Altona the gas and water properties (exclusive of old administration building) which supply the entire requirements of the city and part of the surrounding territory. These gas and water properties will continue to be operated as heretofore through Altona Gas & Water Co. (Altonaer Gas-und Wasserwerke G. m. b. H.), all of whose capital stock has been acquired by the Unterelbe Power & Light Co. from the city. The total population thus served directly and indirectly by the company with electricity, gas and water is approximately 260,000. Sales of electric current, about 37,996,000 k.w.h. in 1924 and 44,612,000 k.w.h. in 1925. More than half the current sold in 1925 was delivered to industrial users. Sales of gas in 1924 and 1925 were in excess of 741,000,000 cu. ft. and 831,000,000 cu. ft., respectively.

The electric properties consist of a plant having an installed turbo-generator capacity of 26,000 k.w., together with high-tension lines for transmission of current to outlying districts and a distribution network within the city providing for a total connected load of in excess 60,000 k.w. New plant to be constructed will bring total generating capacity to 60,000 k.w., as well as extend the transmission and distribution system to care for the rapidly increasing demand in the territory served.

The gas and water properties directly owned by co. and operated through its wholly owned subsidiary consist of (*a*) gas generating facilities capable of producing daily a total of 3,500,000 cu. ft. of coal gas (with by-products), and delivering gas to consumers through about 47,000 meters; and (*b*) a water filtration, central pumping and supply plant serving consumer through about 13,000 meters. Co. either owns or has the exlcusive right to use gas and water distributing systems appurtenant to these plants.

Franchises.—In city of Altona, exclusive franchises granted by the city and extending beyond 1941.

This lien secures a debt of the City of Altona which was not assumed by co. and the city has indemnified co. against any liability for interest or principal thereon.

As co. is municipally owned, it is not subject to a capital charge under the Dawes Plan. However, in accordance with the laws of the German Reich, enacted to put the Dawes Plan into effect, co. is obligated to make annual payments which were estimated at a maximum of about $35,000 per year.

Such additional bonds may also be issued upon deposit of cash with the (German) trustee, which shall subsequently be repayable to co. in the manner to be provided in the indenture securing the bonds.

TOHO ELECTRIC POWER CO., LTD.

(Toho Denryoku Kabushiki Kaisha.)

ORGANIZATION.—Incorporated in its present form June 1922. Represents a consolidation of numerous predecessor companies (some of which began operations as early as 1889) which for many years had been primarily engaged in the distribution of electric light and power. Next to Tokyo Electric Light Co., Ltd., the largest retail distributor of electric energy in Japan.

FIELD OF OPERATONS AND CHARACTER OF BUSINESS.—Directly or indirectly company supplies, practically without competition, electric light and power to more than 5,500,000 people in a territory of approx. 4,000 square miles. Company operates mainly in two distinct areas, the Kansai manufacturing district in and around Nagoya, Gifu, Nara and Toyohashi, in central Japan, and the industrially important Kyushu district in and around Shimonoseki, Fukuoka and Nagasaki, in southern Japan. These districts constitute two of the most important commercial and industrial sections of Japan.

Company generates and purchases power for distribution. The generating stations now owned or under construction have a total capacity of 149,593 k.w. Company also controls an additional 108,500 k.w. under favorable contracts, largely with closely affiliated companies. Other property owned or under construction includes substations with a total capacity of 450,020 kva. and more than 9,200 route miles of transmission and distribution lines, as well as many valuable water power sites, principally on the Tenryu River, which co. plans to develop. Co. has under construction 40,000 k.w. additional generating capacity (incl. a second 35,000 k.w. unit in its new Nagoya steam station); 51,000 kva. transformer stations and approx. 95 route miles of transmission and distribution lines. As is usual with Japanese electric distributing companies, co. also often owns the fixtures and appliances used by its customers, in somewhat the same way as telephones are owned by the telephone companies in the United States.

In addition, co. owns all of the shares of the Toho Securities Co., which has investments in 18 utility and other companies, 8 of which are controlled by stock ownership. Among the companies so controlled is the Toho Gas Co., which does the entire gas business in Nagoya. Another substantial investment consists of stock of the Great Consolidated Electric Power Co. (DAIDO). Co. also engages in coal gas manufacturing and electric railway business as well as in real estate and forestry undertakings deriving about 6% of its gross earnings from these and other miscellaneous operating activities.

Company's system has 916,775 lighting and 28,761 power customers. V. 120, p. 1329.

Franchises.—Concessions for water rights and licenses for the generation and sale of power in Japan are granted under the authority of the Imperial Government, which has general supervisory power over such companies and reserves the inherent right to extend or revoke such grants under certain conditions. All important franchises of the company extend beyond 1955.
